

Seminar Objectives

Upon completion of this seminar the participant should be able to:

1. Review systematic approaches to the assessment of trauma patients
2. Analyze case studies and how systematic approaches are applied in real life scenarios
3. Assess performance of all parts of the healthcare system to identify areas to improve in mass causality events
4. Describe coping mechanisms related to the wellbeing of the healthcare provider
5. Employ new strategies in assessing and caring for the pediatric trauma patient
6. Employ new strategies in assessing and caring for the burn patient.
7. Evaluate and discuss changes and updates in care of the dying trauma patient
8. Assess their individual practice in light of the information and discussions during the course, and identify specific strategies to implement as part of a continuing improvement process for their practices
